VPULSE Connect User's Guide

Below are step-by-step instructions to install, access and print reports from the SD card assigned to each Breg VPULSE System. To begin, you will need:

1. SD Card
2. SD Card reader
3. Computer and Internet Access

Software Installation Steps

1. **Download VPULSE Connect software.** Visit breg.com/vpulseconnect and click "Install Software" button.

BREG.

Welcome to VPULSE Connect™

VPULSE Connect is the patient compliance reporting center for VPULSE. It enables healthcare professionals to monitor how many hours and sessions their patients are utilizing each VPULSE therapy: calf compression, cold therapy and wound compression.

To access reports, follow these steps:

1. Install VPULSE Connect software by clicking "Install Software" at the bottom of this screen (installation only required once per computer).
2. Open VPULSE Connect application on your computer and create your account.
3. Remove the SD card from the VPULSE system and insert into your computer, using an SD card reader.
4. Click to upload data and view/save your report.
5. Insert the SD card back into the VPULSE device for continued use (device will not run without the SD card inserted).

View the User Guide below for more detailed instructions.

4. **Install software.** Browse and choose an Install location, then click "Install."

After the installation has completed click the "Close" button on the Installation Window.

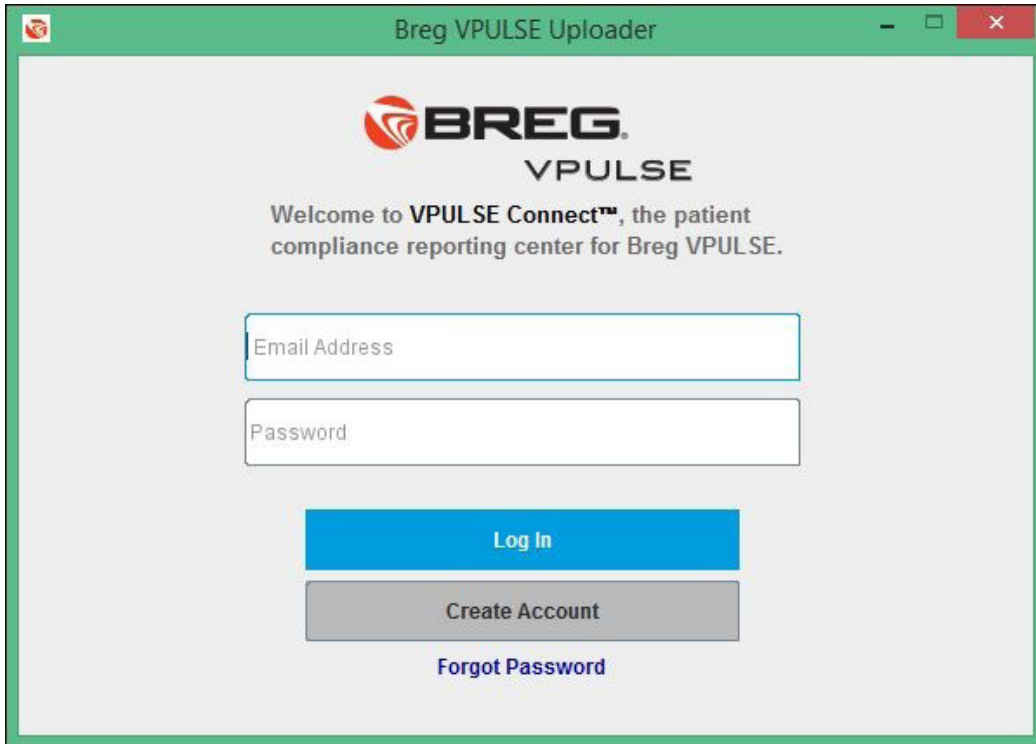

5. **Locate VPULSE Connect icon.** A shortcut icon will be placed on your desktop and a menu group in the Windows Start Menu. Software will only need to be installed once on a computer and then you can read cards as many times as necessary.
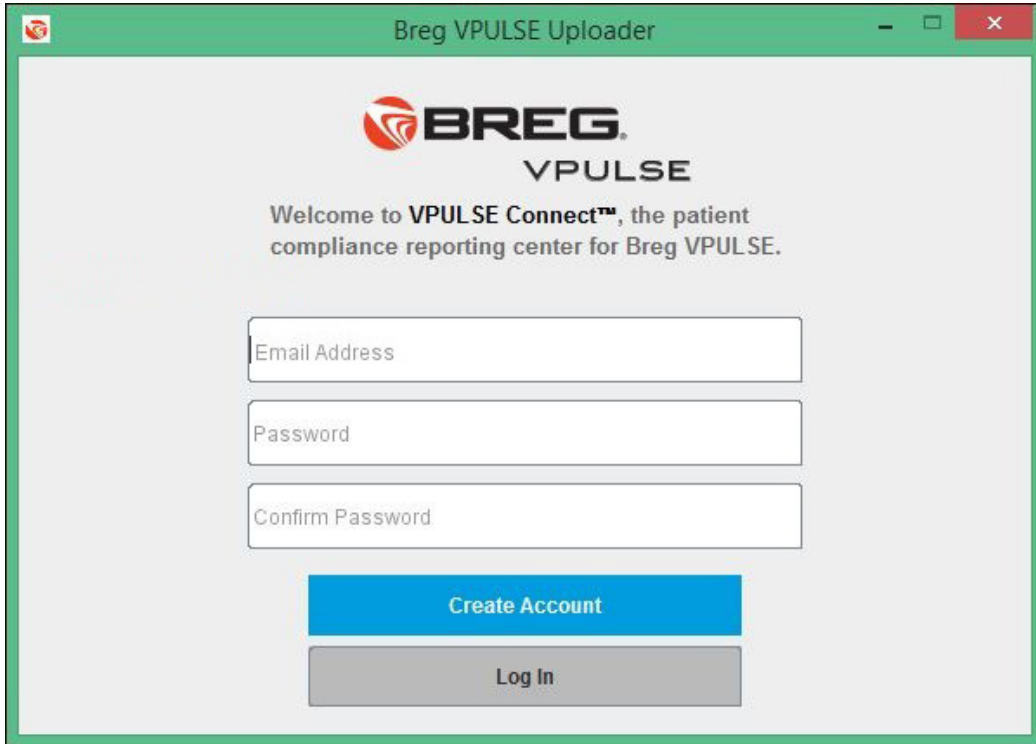

Using VPULSE Connect

1. To start, double click the Breg VPULSE Connect Icon. If you have an account, enter email and password and click on "Log In." If not, click "Create Account."

To create a new account, enter email address and password. Your email address is for your account access only and will not be shared.
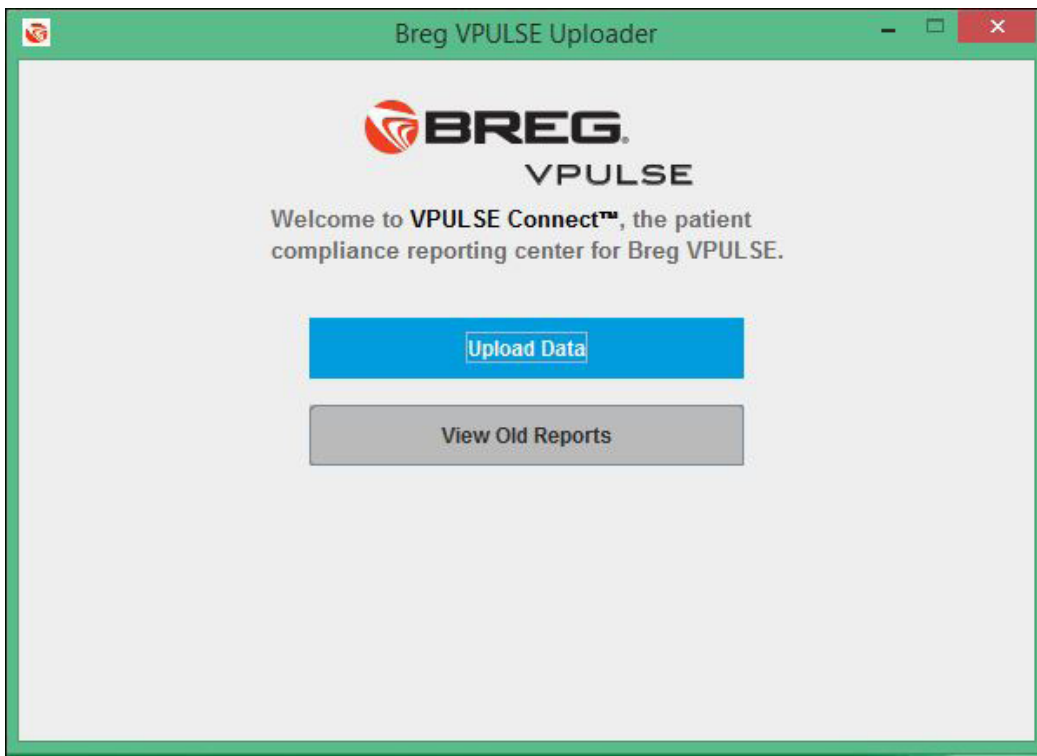

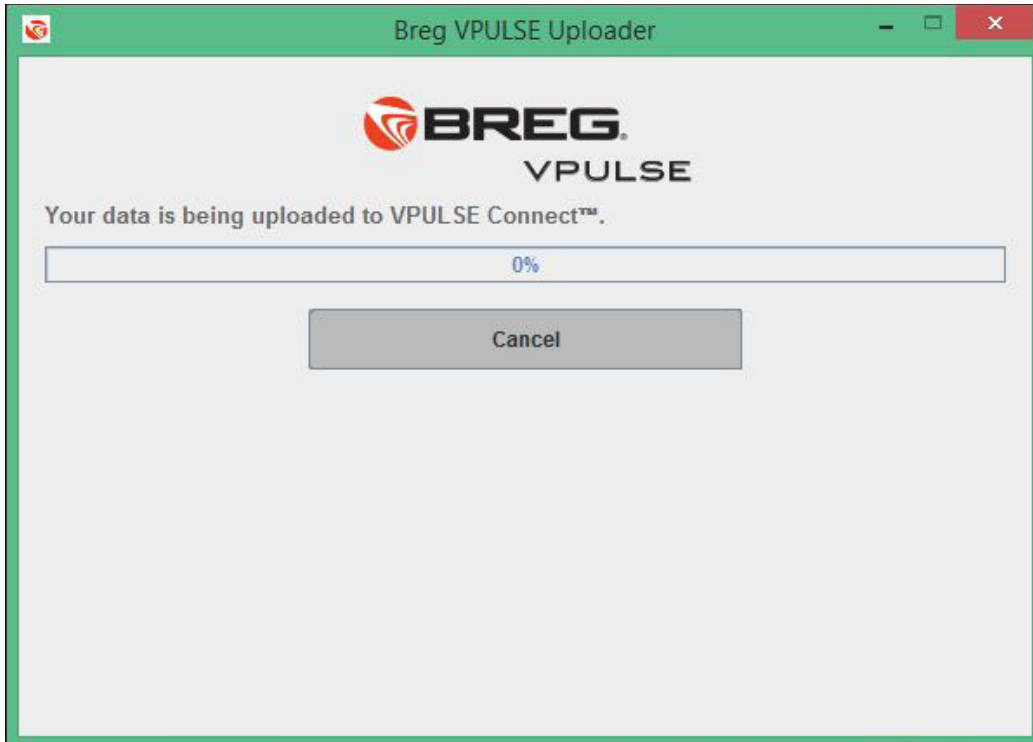

2. Push the SD card to pop it out of the device and then remove. Insert it into an SD card reader or adapter and insert into the USB port or card slot on the side of your computer.

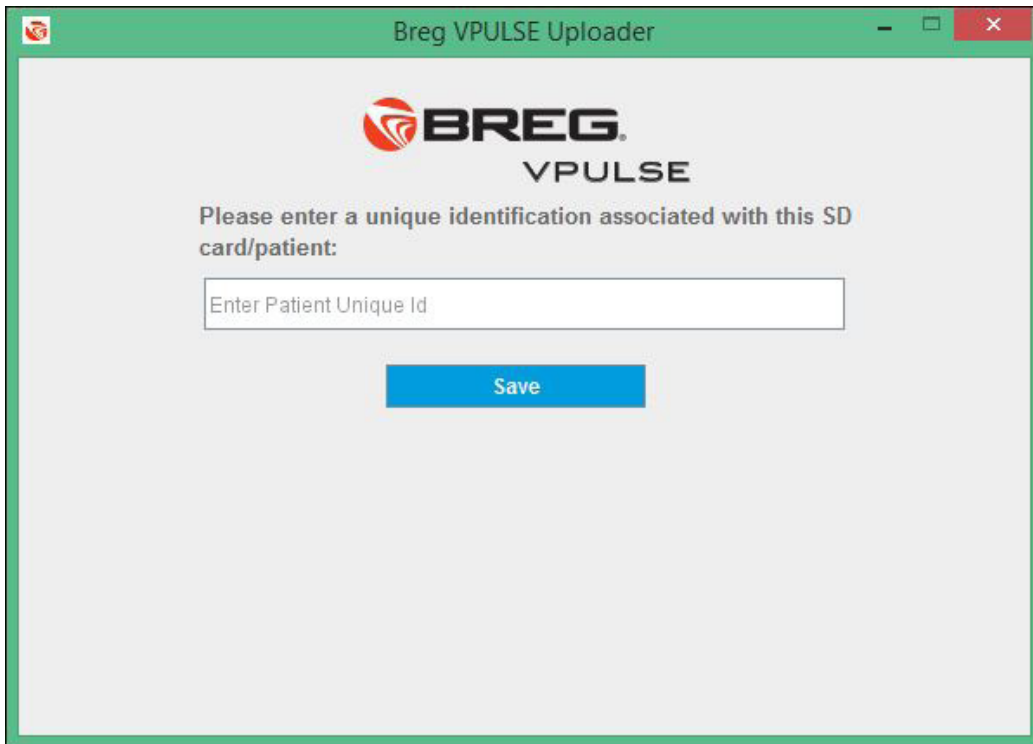

3. Once the SD card has been recognized, click "Upload Data."

You will see the progress of the data upload.

4. Once the data is uploaded, enter "Patient Unique ID" and click "Save" button.
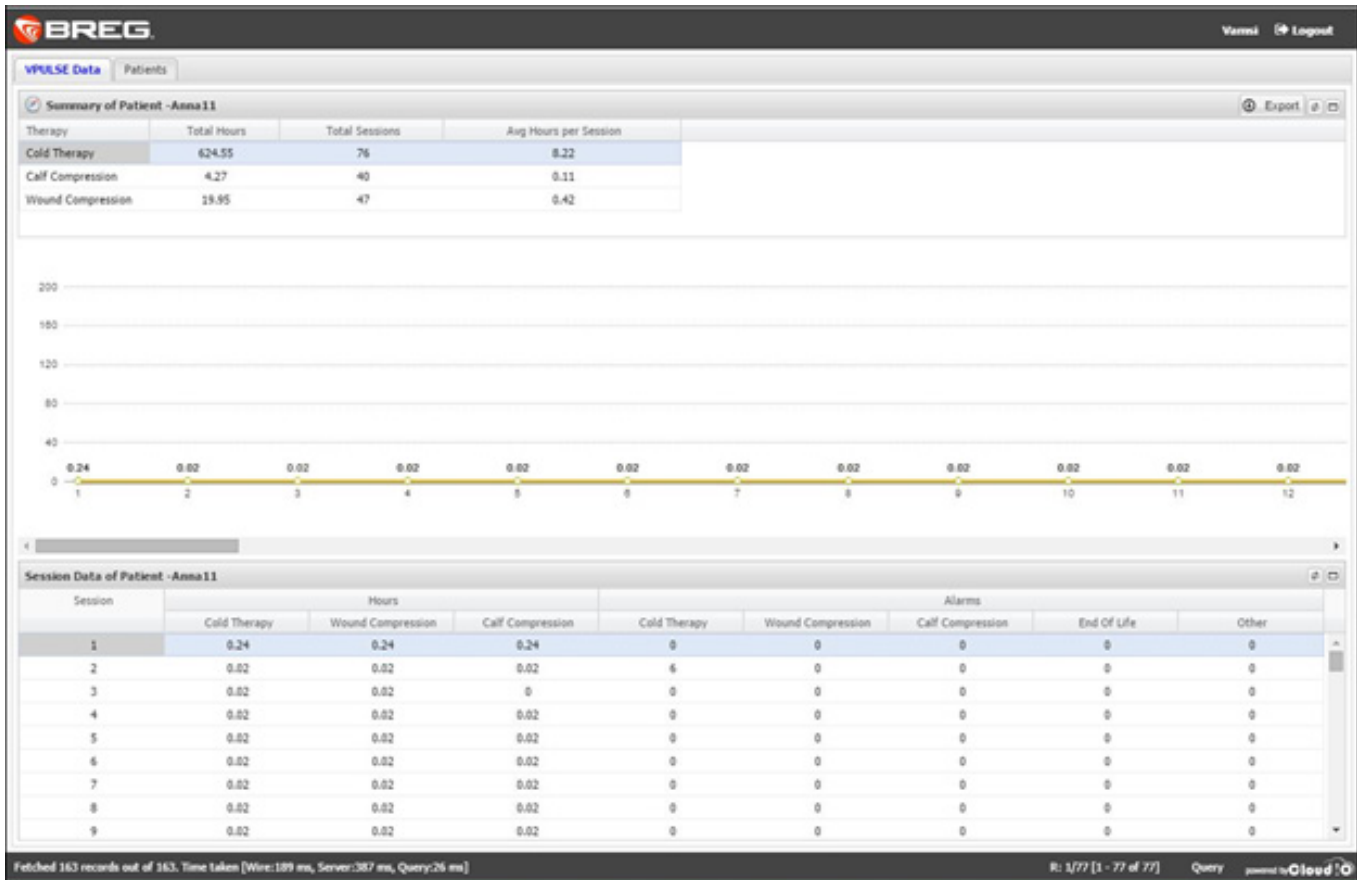

Once you click "Save," data will be turned into a report.

5. Click "View Report" to open the browser & show the report.
   Or click "Read Another Card" to start reading another card.

6. The report will indicate hours of therapy usage and number of sessions that a patient has utilized each VPULSE therapy: calf compression, cold therapy, and wound compression. Here is a sample report:

To save/print the report, click on the Export button on Top Right corner "Summary of Patient XXX" table.
