

Leg Bag Systems

Hollister leg bags maintain a low profile as they rest discreetly against the leg with soft, pleated sides and are held comfortably in place with wide fabric straps.

Portrait:
Bastien Perret, France
"It's not possible for anyone to live life and never have any problems. But for every problem, there is a solution. A person just has to go out and find it."

Leg Bag Systems

The latex-free Hollister vented and non-vented leg bags use an anti-reflux valve to help prevent urine back flow. Our urinary leg bags are designed to be discreet and secure, promoting independence and quality of life.

Anti-Reflux Valve

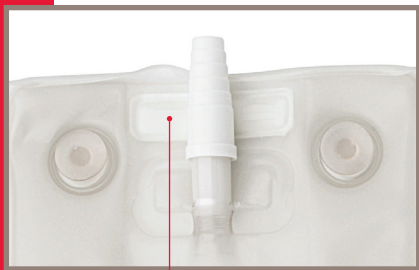

- Helps prevent urine from back flowing into the tubing

Sterile

Soft Vinyl Film

- Helps ensure comfort against the skin and limits unwanted odor

Optional Vented System

Vent

- Helps prevent air build-up in the leg bag, providing a lower profile.

Convenience Drain

- Easy to operate with one hand, even for those with limited dexterity

Buttons

- Low profile buttons help secure the bag

Latex-free bedside drainage collection system with anti-reflux valve also available

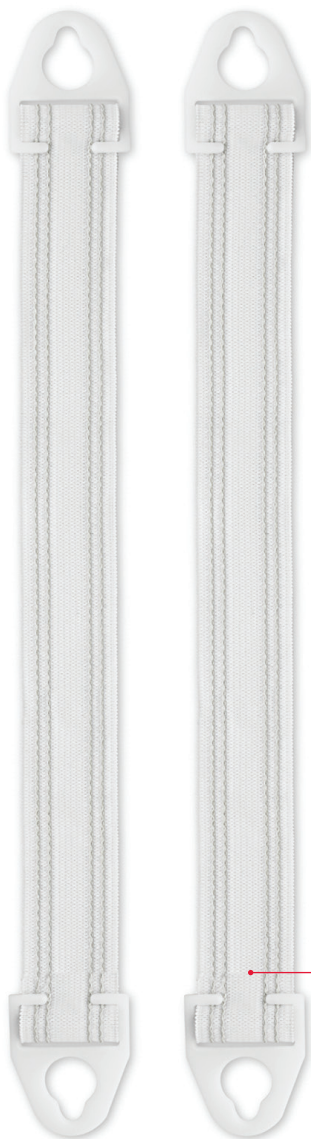

Extension Tubing

- Our oval extension tubing helps keep the fluid pathway open
- Sterile and non-sterile options are available

Fabric Straps

- Wide straps help hold the bag comfortably and securely in place
