

EASYPULSE

Portable Oxygen Concentrators

Do you like to live Actively?

We all do! With EasyPulse POCs, your lifestyle does not need to be dictated by the fact that you have been prescribed medical oxygen. EasyPulse POCs come standard with an internal lithium-ion battery giving you more than 3 hours of freedom to be away from home. By combining the external battery with your EasyPulse, you can enjoy worry-free oxygen supply for almost 10 hours of battery life.

Optional Backpack

3-5 pulse settings

Highest oxygen purity

Most durable and reliable POCs

Compact and lightweight

What is a portable oxygen concentrator?

A portable oxygen concentrator is a battery powered medical device that draws oxygen from your immediate environment and delivers medical oxygen through a cannula. Whether in your living room, at the park or on a plane, EasyPulse POCs can continuously deliver pure oxygen without worrying about running out of oxygen or having to carry heavy tanks around!

Can I fly with my EasyPulse POC?

Yes, of course! Both the EasyPulse POC-3 and EasyPulse POC-5 are FAA approved for in flight use.

Does EasyPulse charge in my Car?

Yes, it does! Do you travel often? Does your weekend consist of several hours of errand-running? With EasyPulse, your POC comes with a car charger so no need to worry about battery decline while traveling in your car!

How much does the EasyPulse weigh?

With the internal battery the EasyPulse POC-3 weighs less than 5 lbs. and the EasyPulse POC-5 weighs 6.6 lbs.
