

# MONONUCLEOSIS TEST

McKesson CONSULT<sup>®</sup> mononucleosis test is designed to aid in the early detection and diagnosis of infectious mononucleosis heterophile antibodies in whole blood, serum and plasma. It offers a simple screening procedure that features an easy to use fingerstick for whole blood. The external positive and negative quality controls help produce quick results for patient diagnosis during office visits. Our mononucleosis test helps ensure high specificity of results with a greater than 99% accuracy rate.

## FEATURES AND BENEFITS

- CLIA waived for whole blood and CLIA moderately complex for serum or plasma
- Easy to read results in as fast as eight minutes
- Available in individually packaged cassettes
- Not made with natural rubber latex
